### Professional Experience

#### Akieni

Software Developer

📍 Brazzaville, Congo

Apr 2024 - present

FullStack Developer TypeScript React NodeJS

- My role involves developing solutions for the company, which specializes in digital transformation and primarily works on government projects. I am currently an intern working as a junior fullstack developer.
- Conduct audits on existing applications and provide recommendations for improvements, maintenance, and scalability of the solution.

#### PossaCode Community

Training Manager

📍 Brazzaville, Congo

Feb 2024 - present

Frontend Developer JavaScript React NextJS Tailwindcss

- I am responsible for organizing internal training sessions aimed at enhancing the skills of community members in emerging technologies. My role involves selecting trainers and ensuring they have a strong foundation to effectively impart their knowledge to participants.
- Additionally, I also handle training for members in modern JavaScript and React.

#### Central Universal Scientific Library (ЦУНБ)

Internship

📍 Ivanovo, Russia

Jan 2023 - Mar 2023

UI / UX designer Frontend Developer HTML CSS JavaScript

- Analysis of the library's official website, proposal of a layout that reveals the design of a modern website adapted for the library.
- Made suggestions and fix bugs on different pages of the website.
- Lead a team of 3 students on the creation of the project.

### Last Completed Projects

#### MaouenePay

🌐 [www.maouenepay.com](http://www.maouenepay.com)

NextJs React Zod Zustand Tailwindcss

- MaouenePay is an application that allows money transfers between Europe, America, and Africa, in both directions.
- This application offers various features, such as credit purchases, card reloading, and is divided into two parts: one for merchants and one for individuals. It also allows you to offer gift cards and access many other services.

#### Royalife Hub

🌐 [www.royallifehub.com](http://www.royallifehub.com)

T3 Stack NextJs TRPC Drizzle React Tailwindcss Zod

- Royalife Hub is a digital marketing application that allows you to build a network by inviting people through a link. For each person you invite, you receive compensation.
- This application offers a wide range of features, such as transferring funds between wallets, withdrawing money, inviting people to your network, and creating and using PINs to expand your network.

#### SAE ( Electronic Archiving System )

AdonisJs Inertia React VineJs Tailwindcss Shadcn UI

- SAE is an electronic document archiving system that allows documents to be electronically archived according to the principles of archiving practices.
- This application allows for the creation of a well-defined filing plan established by the archivist. It enables the creation of repositories, shelves, racks, aisles, and more. Users can configure and generate the filing plan, as well as associate documents with each archive.
